User Operations Manual

1. Introduction

The Inventory Management System is a desktop app designed to help you track products, manage suppliers, and record purchases and sales. It provides a real-time view of your stock levels and financial performance through an easy-to-use interface.

2. Getting Started

- **Login** : Open the app and log in with your username and password. The default admin account is

username **admin** and password is **admin**

admin. For security, please change the admin password immediately after your first login.

- **Dashboard Overview** : The dashboard gives you an instant summary of your business:
- **Key Stats** : Total products in stock, items running low, total inventory value, and estimated profit.
- **Stock by Category** : A pie chart showing how your inventory is divided among different categories.
- **Top Items** : A list of the products that are moved or issued most frequently.

3. Managing Inventory

- **Product List** : Go to the "Products" page to see all your items. You can search for products by name, category, or supplier.
- **Adding Stock (Procurement)** :
 1. **Supplier** : Select an existing supplier or enter a new one.
 2. **Invoice Info** : Enter the invoice number, date, and how you will pay (e.g., Cash or Credit).
 3. **Add Items** : List each product you bought, including its cost, selling price, and quantity.
 4. **Save** : The system will automatically update your stock levels and record the transaction.
- **Issuing Items** : When items are sold or moved out, use the "Issue" feature to record the change.
- **Stock Adjustments** : If you find that the actual stock on your shelf doesn't match the system (e.g., due to damage), use the "Adjustment" tool to correct the numbers.

4. Reports and Summaries

- **Weekly Reports** : The "Summary" page shows your weekly activity, including how much was bought, issued, and the revenue generated.
- **Export to Excel** : You can save any weekly report as an Excel file for your records or further analysis.
- **Activity History** : Select any product to see its full history—every time it was bought, sold, or adjusted.

5. Settings and Profile

- **User Accounts** : Admins can add new users, change roles (Admin or Staff), or remove accounts.
- **Your Profile** : You can update your username, email, and password.
- **Appearance** : Switch between Light and Dark modes to suit your preference.
